

# King Larce Cortes

Kawasaki City, Japan | 070-2827-3564 | hello@kinglarce.com | <https://www.kinglarce.com/>

## Summary

Over 6 years of experience in building web applications.

## Employment History

### Senior Application Developer, January 2019 - Present

**Rakuten** (<https://global.rakuten.com/corp/>)

- Collaborated with a diverse, multi-disciplinary team of engineers, designers, and product managers to build an in-house analytics tool that is now being used by all Rakuten services for their analytics.
- Led a team of four members where I perform requirements analysis, design, development and testing on new features and legacy system improvements.
- Mentored and guided team members ensuring all were trained in product knowledge and capable of handling outages.
- Acted as the contact point between technical team, project managers, tester and analytics consultant.

Techs: Ansible, Apollo, Docker, ELKStack, GraphQL, NodeJS, HapiJS, Jenkins, Jest, MongoDB, Python, ReactJS, Redux, Sass, Typescript

### Software Engineer, August 2016 – January 2019

**Arvato Systems Malaysia** (<https://www.arvato.com>)

- Contributed extensively to EditMate 3 (<https://it.arvato.com/editmate>), an Adobe Premiere plugin.
- Worked closely with the team, product owner, and product manager to discuss estimations, prioritization and feasibility of the features.
- Collaborated on the development of a web app, Andritz (<https://www.andritz.com/>).
- Participated in Hackathon (A.I. For Good Hackathon; <https://thegrandchallenge.mdec.my/b-a-c-4-0-2017/>).
- Graphic artist for the company's social media.

Techs: Python, Django, C#, Angular 4, AngularJS, Adobe CEP, Jasmine, Protractor, Sass, MSSQL, Swagger, jQuery, Java, Photoshop

### Software Engineer, July 2013 – July 2016

**NetTrac Communication Inc.** (<https://nettrac.net/>)

- Engineered and maintained existing e-commerce platform where I handled billing, registration of domains, search functionality for products, and control panel for managing both domains and hosting.
- Successfully launched 5 web applications where I led and managed the development of 2 projects ie eRoam(<https://www.eroam.com/>), and Motize (<https://www.motize.com/>).
- Launched applications: eRoam (<https://www.eroam.com/>), Motize (<https://www.motize.com/>), Nettrac Shopping Cart(<https://nettrac.net/>), Eatnoise (<https://eatnoise.com/>), PMG Intelligence and eSight Survey Tool(<https://www.pmgintelligence.com/>).
- Worked closely with the client to discuss estimations, prioritization, and feasibility of the features.
- Handled the maintenance of the servers, configuring Apache web server and managing clients domains & DNS.

Techs: PHP, Codeigniter, PHPUnit, Joomla, WordPress, CoffeeScript, jQuery, FabricJS, MySQL, Google Maps Platform

## Education
